

Date

Date is a fruit rich in iron, magnesium and calcium with lots of health benefits. The nature of dates is hot and dry. Do not forget to take daily portions of dates to have healthy bones. Dates are a good substitute for natural sweeteners that help lower the blood sugar. Qaed dates are very diverse and have high quality, healthy and clean appearance.

Types of dates

•Piarem dates

This type of date has a thin and wrinkled skin. The flesh and the skin of the date are completely stuck together, making a dark brown color. The size of these dates is medium to large and they are known as chocolate dates because of their special and delicious taste. Piarem dates are of high-quality and first-class dates which are rich in sugars, proteins and other minerals that have high nutritional value, also known as the most expensive and high-quality dates in the world.

•Features of Piarem dates

- Size: 3-5 cm
- Texture: Semi-dry
- Humidity: below 15%
- Shape: Oval, long and elongated
- life: At room temperature about 18 months
- Taste: Sweet with sufficient amount of sugar Shelf

- **Separating Piarem dates**

In separating Piarem dates, size, color and number of dates per kilo are of high significance.

Standard Piarem: 120-140 dates per kilo.

Super Piarem: There are 110-130 dates per kilo.

Golden Piarem: There are 145-120 dates per kilo.

•Zahedi Date

This date has a soft texture and a light brown color. The sweetness of this date is less than other dates and it is recommended for people who do not like much sweetness. Zahedi date is elongated oval and quite narrow and sharp in its bottom. The amount of adhesion to the fruit is medium and while it is delicious, it has a high shelf life and at a cheap price. Zahedi dates are classified as dried dates.

- Kabkab Date

Dark brown, Kabkab Date has an oval and elongated core as the weight of each seed is between 10 to 18 grams. Kabkab Dates are stuck together and are so-called pressed and look very soft when consumed due to their juice. In the category of dates, these dates are among the wet dates.

- **Mazafati dates**

It is one of the soft, delicious and popular dates that its average size ranges from 2.5 to 4.5 cm. The skin of Mazafati dates is black, shiny, thin and smooth, and it also has very tasty meat, nectar and taste, with a skin easily separated from the meat. Mazafati dates have a sweet and hearty taste, having gone down a treat among people.

- **Mordab Sang Date**

Light brown or golden, this type of date has excellent quality. It is highly similar to Piarem dates in terms of shape and taste, but the color of this date is lighter than Piarem with a softer texture. Mordab Sang has good durability and can be stored for one year.

•Khassui Dates

Khassui dates are round and small and because of their small size, they are also called plum dates. Usually, all three Khassui dates are the same size as the other dates. This date is sweeter than other dates, but its sweetness does not bother the throat and exits in the form of syrupy and semi-dry. Khassui date nectar is used to produce a variety of cakes and energy drinks.

•Barhi dates

Barhi dates have an oval appearance with a thick flesh. When ripe, it's color turns to light brown, having a good aroma and a sweet taste similar to caramel and brown sugar. The texture is crispy and the kernels are easily separated from the flesh. These characteristics have made Barhi dates as the best and most desirable dates.

•Rabi dates

This type of date is elongated, tall, fleshy and relatively large, also classified as semi-dry dates. Not only does this date have a lot of juice and known as the earliest date, but also it does not need refrigeration for storage and can be stored in a dry and cool environment for 18 months.

- Shahani dates

Shahani date is a thin and elongated date, its color is light brown and it has the lightest color among other dates. The skin of this date is thin and can be easily separated from the flesh of the date. This date contains lots of sweets, but the sweets in this date are non-harmful sugars used in a variety of sweets, cakes, jams.

- **Kaloteh dates**

Kaloteh dates have a soft flesh and are easily chewed. Kaloteh dates strike a resemblance to Mazafati ones, but the texture of these dates is a little firmer. The size of this date is about 2.5 to 3.5 cm, which has a moderate juice and is classified as wet or semi-wet dates. The high quality and good taste of this date has attracted many fans.

Packaging

Considering that dates have a soft texture and break down as a result of pressure, the packaging process and other operations are mechanized. Unquestionably, the packaging is done according to the customer's demand and is stored in cold warehouses at 4-5 ° C until delivered to the customer.

- **Packages in two-row boxes**

Containing 32 packages of dates with 2 * 4 * 4 arrangement.
The weight of date packages ranges from 380 to 520 grams.
